EVOLUTION IS A THING OF BEAUTY

The new S1 Baton is the latest evolution of our most popular Baton series. At less than 2.5 inches, and just over one ounce, the S1 Baton fits easily in your pocket, making it perfect for everyday carry. But don't be fooled, while the S1 Baton is small, its TIR-focused output is a mighty 500 lumens whose beam reaches 360 feet. And it has plenty of features to be the most useful light you can own, like its magnetic tailcap, variable light settings, and automatic timer shutoff. The S1 Baton is the next step in flashlight evolution and it is beautiful.
